SERIES 59 DORMANT

A TWO-COAT METALLIC POWDER COATING BASED ON POLYESTER

Typical applications

- sporting goods
- parts not permanently exposed to UV light

Product details

<table>

Specific Gravity (ISO 8130-2)

- 1.2-1.7 g/cm³ depending on pigmentation

Theoretical Coverage

- at 60 µm film thickness: 9.8-13.8 m²/kg depending on specific gravity (please see also Information Sheet no. 1072 - latest edition)

Storage Stability

- 6 months from date of delivery under dry conditions at no more than 25 °C, avoid direct and extended heat exposure.

(The shelf life of custom made blanket orders or other stock agreements which by their nature are stored over longer periods is determined by the original production date.)

Features

- high transparency effect
- good flow properties

Finish | Colors

1. base-coat - dormant:
- as customer order only

2. top-coat - transparent:
- clear, glossy - Series 59, 17, 47
- glitter, glossy - Series 47
- clear, flat matte - Series 16
Drylac® Series 59 Dormant

Pretreatment (alternatives)

The following table reflects the common methods of pretreatment with regards to various substrates and applications. In selecting the proper type of pretreatment please observe the suitability of the type of powder coating for a desired application according to the guidelines on page one of this Product Data Sheet.

Processing

Corona, Tribostatic*

* Suitability of metallic effects for tribo processing must be verified prior to application. Please consult with the relevant Information Sheets, latest edition.

Cure parameters

(substrate temperature)

Please observe cure parameters closely since mechanical properties will develop before full cross-linking! Since a variation in curing time and curing temperature may result in a color deviation, always apply the same curing agenda to the same color. Furthermore, a consistent film thickness is of importance.

Thanks to their different chemistry do not mix different product lines (Series) with each other. Clean the line thoroughly when changing from one product line or manufacturer to another.
Please note (clear and transparent coatings)

A change of color should always be preceded by a thorough cleaning of the entire coating line. Additionally, extended oven ventilation is recommended, as otherwise slight discolorations of subsequent coatings may occur.

Non-colored coatings, e.g. clear coatings may be prone to stress cracks due to the difference in material tension between the substrate and the powder coating. In order to minimize the risk of stress cracks it is recommended to cure the clear and/or transparent top-coat only at the upper end of the relevant cure window as set forth in this Product Data Sheet.

Please mind the effect and color differences between a lab match versus an actual production.

Test results

Checked under laboratory conditions on a chromated aluminum test panel which is 0.7 mm thick. Actual product performance may vary due to product specific properties such as gloss, color, effect and finish as well as application related and environmental influences.

Our verbal and written recommendations for the use of our products are based upon experience and in accordance with present technological standards. These are given in order to support the buyer or user. They are non-committal and do not create any additional commitments to the purchase agreement. They do not release the buyer from verifying the suitability of our products for the intended application. We warrant that our products are free of flaws and defects to the extent as stipulated in our Terms of Delivery and Payment.

As a part of our product information program each of our Product Data Sheets are periodically updated, so that the latest version shall prevail. Therefore, please visit the download area of www.tiger-coatings.com to make sure you have the most current version of this Product Data Sheet. The information in our Product Data Sheets is subject to change without notification.

This Product Data Sheet substitutes any and all previous Product Data Sheets and notes for customers published on this subject matter and is only intended to give a general product overview. Please request specific information for products outside of our standard product list (latest version).

The Technical Information Sheets and the Terms of Delivery and Payment each in their latest version, available as a download at www.tiger-coatings.com, form an integral part of this Product Data Sheet.
